PROFILE

I am an industrial engineer, with experience working in supply chain. However, due to vocational preferences, I decided on a change in my professional profile and started studying Software Engineering and working as a full-stack developer.

EDUCATION

Software Engineering (4th grade)	Engineering Faculty, UDELAR	2018 - Present
Graduated in Industrial Engineering	Engineering Faculty, UDELAR	2009 - 2015
First Certificate in English	University of Cambridge	2000 - 2008

SKILLS

Ruby On Rails - React - SQL - Scrum

Git - Javascript - Redux - React Router - Heroku - GCP - Stripe - Mailgun - Twilio - Salesforce - Postman - Honeybadger

PROFESSIONAL EXPERIENCE

Vairix   **02/2021 - Present**
Full Stack Developer   **Montevideo, Uruguay**
Since joining the team, I have continued to acquire knowledge in Ruby on Rails and learned other technologies, such as React. I've worked on building robust web applications and seamless user experiences working as a staff augmentation professional for an American company, where I've gained hands-on experience with a wide range of technologies, including SQL, Redux, React Router, GCP and Heroku, have integrated key APIs such as Stripe, Mailgun, Twilio and Salesforce, and have used development tools such as Postman and Honeybadger to ensure quality and reliability.

EagerWorks SRL   **09/2019 - 02/2021**
Full Stack Developer   **Montevideo, Uruguay**
Worked as a full-stack developer using Ruby on Rails framework gaining experience in, within others, authentication and authorization systems, background jobs, scheduled tasks, ajax requests, third-party APIs integration, internationalization, mailers, data visualization, etc. Alongside RoR, I also gained experience with other languages, libraries and development tools such as HTML, CSS, JS, bootstrap, git, GitHub, SQL and Heroku. During this time, I have dealt with a variety of clients, spanning from small local companies to large multinational corporations using Agile/Scrum development techniques, staying in touch with clients daily, and reaching mutual agreements on ideas and next steps.

Montevideo Refrescos SRL   **04/2017 - 09/2019**
Maintenance Analyst   **Montevideo, Uruguay**
Planned preventive and corrective maintenance for the Coca-Cola products bottling company in Uruguay.
- Executed the maintenance migration in SAP. Approximately 1,800 maintenance plans were redesigned.

Yazaki Uruguay SA   **05/2015 - 12/2016**
Production Coordinator   **Las Piedras, Uruguay**
Supervised production plan on a daily basis, coordinating activities with 3 production supervisors.
- Led a team of 200 plant operators with 4 plant supervisors direct reports and negotiated with labor unions.

Abengoa Teyma SA   **11/2012 - 10/2013**
Technician Assistant   **Montevideo, Uruguay**
Constructed the electro-mechanical cost-estimate of water purification plant and of concrete/cement plant extension.
